About Us

ABOUT GMK EDU

GMK EDU skills training specializes in bridging the gap and offering the alternatives to traditional learning. Focusing primarily on employable skills training and development.

We have approx. 5000 students benefiting from our group

VISION

To provide and empower learners with technical skills.

MISSION

To equip our students with trade & skills that are in demand. Our mission is to empower our students to get involved in careers where they would enjoy & be of service. GMK skills training was introduced, with just one purpose in mind – to provide professional and comprehensive training, without compromise, to our community. To empower the youth!

WHAT IS A GARDEN DESIGNER?

A garden designer is a professional who plans and creates outdoor spaces such as gardens, courtyards, and landscapes. Their work combines creativity, horticultural knowledge, and design principles to make functional and beautiful environments.

They typically:

Assess the site

Studying soil, sunlight, drainage, and existing plants.

Develop design concepts

Choosing layouts, plant types, materials, and features like paths, ponds, or seating areas

Create detailed plans

Drawings or digital designs that guide construction and planting

Collaborate with landscapers

Ensuring the design is built according to plan
