WHAT IS POULTRY FARMING?

Poultry farming is the practice of raising domesticated birds—such as chickens, ducks, turkeys, and geese—for the purpose of producing meat, eggs, or feathers. It's a major branch of animal agriculture and plays a key role in global food production.

The main types of poultry farming include:

Broiler farming

Raising chickens specifically for meat production

Layer farming

Raising hens for egg production

Duck and turkey farming

For both meat and eggs, depending on the species

WHAT WE OFFER

Poultry Farming - NQF Level 5

Advanced poultry management

Key Learning Areas:

- Commercial production
- Biosecurity protocols
- Business planning
- Quality control

Entry requirement: An NQF Level 4 qualification with Mathematical Literacy

Duration: 12 months

Accredited certification upon completion
